

We believe in preserving our future. That is why Kent Collision and Glass is using **Environmentally Friendly Products** from PPG – a world leader in automotive finishes.

The environment is important to us. Kent Collision and Glass stays ahead of the curve in service and technology. Now we are also **the area leader in environmental preservation by utilizing waterborne high performance paint** – Envirobase®. Envirobase delivers superior color-matching accuracy in a quality paint and offers these environmental benefits:

- Improved air quality in the shop and our community
- Reduced VOC emissions up to 80%
- Reduced hazardous waste

We use environmentally-friendly waterborne paint from PPG.

**ENVIROBASE®**  
**HIGH PERFORMANCE**

## Respect Your Vehicle's Finish!

At Kent Collision and Glass we have gone to great lengths to ensure your vehicle has the finest paint finish possible. Here are some things you can do to protect your newly painted vehicle for the next 30 to 90 days.

- Do not wax or polish the vehicle. The paint needs to dry and harden completely.
- Do not use products that contain silicone—waxes or polishes.
- Do not use a commercial car wash. Brushes and sponges may damage the surface.
- It is preferable to hand wash the vehicle. For the first 30 days wash the vehicle with cool water and a mild car wash solution. Use a clean, soft rag or sponge. Wash your car in the shade, not in the hot sun.
- Do not dry wipe you vehicle. Always use water.
- Park in a garage or under a roof if at all possible.
- Avoid parking under trees. Tree sap and bird droppings may damage the finish. Remove these substances as soon as possible.
- Avoid road conditions that may chip the paint. New paint is more easily chipped in the first 30 days.
- Be aware that "acid rain" may mar your finish.
- Do not allow spilled chemicals to stand on the vehicle's paint surface. These would include gasoline, anti-freeze, windshield wiper fluid, oil and transmission fluid. This is only a partial list of possible substances that may damage the finish. Remove any chemical quickly by rinsing with water. Do NOT wipe.
- Do not scrape ice or snow from the surface. Brush off—carefully.

## Kent Collision & Glass – A Reputation for Excellence

Since 1968 the Kent and Graham families have served the automotive needs of the Twin Lakes Area. Throughout the many years, one thing has remained the same: the Kent commitment to excellence in all aspects of automotive repair.

We maintain our high level of customer service by continually investing in employee training and state-of-the-art technology. Providing our customers with unsurpassed quality and service on all makes and models is our number one goal.

To bring your vehicle back to factory standards, the highest quality service, technology and parts available should be used. **We pledge to use excellent products & provide superior service at competitive prices** for all vehicles -foreign and domestic.

## Diagnostic precision & factory standards

### Kent Collision & Glass – Quality Customer Service

- All vehicles - foreign and domestic
- Free estimates
- Free pickup and delivery
- Free shuttle service
- Rental cars available
- Insurance claims made easy
- Glass replacement
- Limited lifetime warranty on labor and paint for original owner
- 12 months/12,000 mile warranty on new parts
- ASE, GM, and I-CAR certified technicians
- Paintless dent repair

## Environmental Fact

For a shop that mixes an average of 1 gallon of basecoat per week, the move to water-borne saves over 300 pounds of VOC (Volatile Organic Compounds) annually...  
...that's the equivalent of eliminating the emissions of more than 1,250 cars per year!

### Kent Collision & Glass – Shark Computerized Electronic Measuring System

- Frame straightening uses ultrasound technology to acquire precise measurements
- Maintains diagrams of damage before and after repair for quality assurance
- Records information, a complete history of your vehicle repairs
- Connected to the largest collision repair manufacturer in the world to ensure your vehicle is repaired to factory standards
